

COMPANY OVERVIEW

Twenty-six years of paper, pressure & precision.

We started as a single corrugation line and grew, order by order, into three facilities and a six-line product range — without changing the basic promise: tell us the spec, and we'll build it to match, on time.

Paper-N-Pak manufactures corrugated boxes, cartons, and custom packaging built to protect what our customers ship — from textile bales to fresh produce. Every carton starts as high-grade kraft paper, reinforced with strong adhesives and stitched seams, then cut, printed, and finished to exact dimensions.

Our lines run at two speeds: the steady cadence of scheduled orders, and the urgency of a customer who needed stock yesterday. That dual capability, backed by consistent quality control, is what keeps our factory floor busy and our client relationships longer than most in this business.

**“Stronger packaging.
Smarter solutions.
Sustainable future.”**
